Annex 4.1

Specific Rules of Origin

Part I – General Interpretative Notes

1. For purposes of interpreting the rules of origin set forth in this Annex:
 - (a) the specific rule, or specific set of rules, that applies to a particular heading or subheading is set out immediately adjacent to the heading or subheading;
 - (b) the requirement of a change in tariff classification applies only to non-originating materials;
 - (c) where a specific rule of origin is defined using the criterion of a change in tariff classification, and it is written to exclude tariff provisions at the level of a chapter, heading or subheading of the Harmonized System, it shall be construed to mean that the rule of origin requires that materials classified in those excluded provisions be originating for the good to qualify as originating;
 - (d) when a heading or subheading is subject to alternative specific rules of origin, the rule will be considered to be met if a good satisfies one of the alternatives;
 - (e) when a single rule of origin is applicable to a group of headings or subheadings and that rule of origin specifies a change of heading or subheading, it shall be understood that the change in **headings or subheadings** may occur within a single **heading or subheading** or between **headings or subheadings** of the group. When, however, a rule refers to a change in **heading or subheading** “outside that group” this shall be understood to require that the change in **heading or subheading** must occur from a **heading or subheading** that is outside the group of **headings or subheadings** set out in the rule;
 - (f) reference to weight in the rules for goods provided for in Chapter 1 through 24 of the Harmonized System means dry weight unless otherwise specified in the Harmonized System;

2. The following definitions apply:

chapter means a chapter of the Harmonized System;

Mineral Fuels, Mineral Oils and Products of their Distillation; Bituminous Substances; Mineral Waxes

Note:

For purposes of this chapter, a “chemical reaction” process (including a biochemical process) which results in a molecule with a new structure by breaking intramolecular bonds and by forming new intramolecular bonds, or by altering the spatial arrangement of atoms in a molecule.

The following are not considered to be chemical reactions for the purposes of this definition: (a) dissolving in water or other solvents, (b) the elimination of solvents including solvent water; or (c) the addition or elimination of water of crystallization.

For purposes of heading 27.10, the following processes confer origin:

- (a) **Atmospheric distillation:** A separation process in which petroleum oils are converted, in a distillation tower, into fractions according to boiling point and the vapor then condensed into different liquid fractions. Liquefied petroleum gas, naphtha, gasoline, kerosene, diesel/heating oil, light gas oils, and lubricating oil are produced from petroleum distillation;
- (b) **Vacuum distillation:** Distillation at a pressure below atmospheric but not so low that it would be classed as molecular distillation. Vacuum distillation is useful for distilling high-boiling and heat-sensitive materials such as heavy distillates in petroleum oils to produce light to heavy vacuum gas oils and residuum. In some refineries gas oils may be further processed into lubricating oils.

Rules 1 through 7 of this Section confer origin to a good of any chapter or heading in this Section, except as otherwise specified in those rules.

Note 2

Notwithstanding Note 1, a good is originating if it meets the applicable change in tariff classification or satisfies the applicable value content requirement specified in the rules of origin in this Section.

Rule 1: Chemical Reaction Origin

A good of Chapters 28 through 38, except ethyl isopropyl thionocarbamates of subheading 2930.20 and goods of heading 38.23, that is the product of a chemical reaction shall be considered to be an originating good if the chemical reaction occurred in the territory of one or more of the Parties. Notwithstanding any of the product specific rules, the "chemical reaction" rule may be applied to any good classified in the above chapters.

Note: For purposes of this section, a "chemical reaction" is a process (including a biochemical process) that results in a molecule with a new structure by breaking intramolecular bonds and by forming new intramolecular bonds, or by altering the spatial arrangement of atoms in a molecule.

The following are not considered to be chemical reactions for the purposes of determining whether a product is an originating good:

- (a) dissolution in water or in other solvents;
- (b) the elimination of solvents including solvent water; or
- (c) the addition or elimination of water of crystallization.

Rule 2: Purification Origin

For a good of chapters 28 through 38, a good that is subject to purification shall be treated as originating provided that one of the following occurs in the territory of one or more of the Parties:

- (a) purification of a good resulting in the elimination of 80 percent of the content of existing impurities; or
- (b) the reduction or elimination of impurities resulting in a good suitable for one or more of the following applications:
 - (i) pharmaceutical, medicinal, cosmetic, veterinary, or food grade substances;

- (ii) chemical products and reagents for analytical, diagnostic or laboratory uses;
- (iii) elements and components for use in micro-elements;
- (iv) specialized optical uses;
- (v) non toxic uses for health and safety;
- (vi) biotechnical use;
- (vii) carriers used in a separation process; or
- (viii) nuclear grade uses.

Rule 3: Mixtures and Blends

A good of chapters 30, 31, 33 through 38 except for heading 38.08, shall be treated as originating if the deliberate and proportionally controlled mixing or blending (including dispersing) of materials to conform to predetermined specifications which results in the production of a good having physical or chemical characteristics which are relevant to the purposes or uses of the good and are different from the input materials, occurs in the territory of one or more of the Parties.

Rule 4: Change in Particle Size

A good of chapters 30, 31, and 33, shall be treated as originating if the following occurs in the territory of one or more of the Parties: the deliberate and controlled modification in particle size of a good, including micronizing by dissolving a polymer and subsequent precipitation, other than by merely crushing or pressing, resulting in a good having a defined particle size, defined particle size distribution or defined surface area, which is relevant to the purposes of the resulting good and have different physical or chemical characteristics from the input materials is considered to be origin conferring.

Rule 5: Standards Materials

A good of chapters 28 through 38, shall be treated as originating if the production of these materials occurs in the territory of one or more of the Parties.

For the purposes of this rule “standards materials” (including standard solutions) are preparations suitable for analytical, calibrating or referencing uses and having precise degrees of purity or proportions which are certified by the manufacturer.

Subject to Authentication of English and Spanish Versions
Draft 6 January 2006

Rule 6: Isomer Separation

A good of chapters 28 through 38, shall be treated as originating if the isolation or separation of isomers from mixtures of isomers occurs in the territory of one or more of the Parties.

Rule 7: Separation Prohibition

A good that undergoes a change from one classification to another in the territory of one or more of the Parties as a result of the separation of one or more materials from a man-made mixture shall not be treated as originating unless the isolated material underwent a chemical reaction in the territory of one or more of the Parties.

Draft 6 January 2006

Notwithstanding Note 1, a good is originating if it meets the applicable change in tariff classification or satisfies the applicable regional value content specified in the rules of origin in this Section.

Rule 1: Chemical Reaction

A good of chapters 39 through 40 that is the product of a chemical reaction shall be considered to be an originating good if the chemical reaction occurred in the territory of one or more of the Parties. Notwithstanding any of the product-specific rules of origin, the "chemical reaction" rule may be applied to any good classified in chapters 39 through 40.

For purposes of this section, a "chemical reaction" a process (including a biochemical process) which results in a molecule with a new structure by breaking intramolecular bonds and by forming new intramolecular bonds, or by altering the spatial arrangement of atoms in a molecule.

The following are not considered to be chemical reactions for the purposes of determining whether a product is an originating good:

- (a) Dissolution in water or other solvents;
- (b) The elimination of solvents including solvent water; or
- (c) The addition or elimination of water of crystallization.

Rule 2: Mixtures and Blends Origin

A good of chapters 39 through 40, shall be treated as originating if the deliberate and proportionally controlled mixing or blending (including dispersing) of materials to conform to predetermined specifications which results in the production of a good having physical or chemical characteristics which are relevant to the purposes or uses of the good and are different from the input materials occurs in the territory of one or more of the Parties.

Rule 3: Purification

A good of chapters 39 through 40, shall be treated as originating provided that one of the following occurs in the territory of one or more of the Parties:

- (a) Purification of a good resulting in the elimination of 80 percent of the content of existing impurities; or
- (b) The reduction or elimination of impurities resulting in a good suitable for
